01 PROFILE

Full stack software engineer with 3+ years of professional experience shipping products for startups, brands and enterprise, from polished frontends to rock-solid backends and deployments. I build web and mobile apps, Web3 products and internal tools, and I teach developers by breaking hard concepts into clear, actionable knowledge. People say I'm easy to work with; I care about both the code and the people behind it.

02 EXPERIENCE

Freelance Full Stack Engineer
2023 TO PRESENT

SELF-EMPLOYED Remote · devnwamini.com

- Delivered 20+ web, mobile and Web3 projects for 10+ brands across e-commerce, fintech, automotive, education, property and health.
- Own projects end to end: scoping, UI build, APIs, databases, deployment and ongoing maintenance.
- Provide technical consulting: architecture reviews, tech stack decisions and code audits for startups and teams.
